# ***CITY OF AUBURN FINANCIAL POLICIES FY 2017***

## **I. BUDGET**

### **Budget**

The budget process provides the primary mechanism by which key decisions are made regarding the levels and types of services to be provided given the anticipated level of available resources. Budget policy states how this is achieved and addresses the need for financial health and stability.

### **Balanced Budget**

The budget shall be balanced for the General Fund. Total anticipated revenues plus that portion of the fund balance, in excess of authorized reserves, that is designated as a budget funding source shall equal total estimated expenditures for each fund.

### **Financing Current Expenditures**

Current expenditures shall be financed with current revenues which shall include that portion of fund balance in excess of authorized reserves. The City shall avoid budgetary procedures that balance current expenditures through the obligation of future resources, or which finance on-going expenditures with one time revenues. The City shall strive to avoid short-term borrowing to meet operating budget requirements. Nevertheless, this policy shall not prohibit short-term borrowing should a critical need arise.

### **Level of Budget Adoption**

All budgets shall be adopted at the legal level of budgetary control which is the fund/department level (i.e., expenditures may not exceed the total appropriation for any department within a fund without the City Council's approval). All budgets shall be adopted on a basis consistent with Generally Accepted Accounting Principles as promulgated by the Governmental Accounting Standards Board.

### **Budget Categories**

The following categories exist for budgetary preparation and presentation:

- \* Personal Services and Employee Benefits
- \* Purchased / Contracted Services
- \* Supplies
- \* Capital Outlays
- \* Inter-fund / Interdepartmental Charges
- \* Depreciations and Amortization
- \* Other Costs
- \* Debt Service
- \* Other Financing Uses

### **Budget Objective by Type of Fund**

The following budget objectives are established for the different types of funds utilized

by the City:

\* **General Fund** - The budget for the General Fund shall provide for the general government operations of the City and maintain working capital necessary for financial health and stability.

\* **Special Revenue Funds** - Budgets are prepared for special revenue funds that display the legally restricted revenue sources and how these sources are utilized.

\* **Debt Service Fund** - Revenues shall be established and fund balance maintained sufficient for debt expenditures and to provide for any debt service cash flow deficiencies which would occur prior to the receipt of property tax.

\* **Capital Projects Fund** - Budgets for capital projects shall not lapse at the end of a fiscal year, but shall remain in effect until project completion or re-appropriation by City Council resolution.

\* **Proprietary Funds (Internal Services and Enterprise)** - Although budgets for this type of fund are not required under generally accepted accounting principles, budgets shall still be prepared in order to monitor revenues and control expenses.

\* **Internal Service Fund** - Internal service fund budgets shall be prepared on a self-supporting basis. Revenue rates and charges shall be identified to cover all expenses, including depreciation and debt service (if applicable).

\* **Enterprise Fund** - A business approach is used in budgeting for enterprise funds. Enterprise shall be self-supporting when possible and minimize losses when breakeven is not possible.

\* **Trust Fund** - Budgets are not required for trust funds since trustee agreements provide necessary spending authorization and control.

### **Performance Budget**

In addition to the line item budget, the budget document shall include "performance" budget information. The performance budget provides information on the goals and objectives which each department has determined that it seeks to accomplish during the budget year. The performance budget also utilizes "performance indicators" which measure services rendered and departmental efficiency / effectiveness on a historical basis and projects targets of the indicators for the upcoming budget year. The City shall strive to minimize, and reduce if possible, staffing levels required to accomplish its service delivery.

### **Budget Preparation**

For each department, budgets shall be prepared for current service level. Expanded services or extraordinary items shall be summarized in one page or less for discussions

with the City Administrator/Mayor before further detail is prepared regarding the expanded service or extraordinary item. A current services budget is defined as that level of funding which is necessary to provide the same level of service for the upcoming year that is currently being provided. An expanded services budget includes funding request associated with new service and/or additional personnel.

### **Budgetary Control / Reports**

A system of budgetary controls shall be maintained to assure adherence to the budget. Timely financial reports shall be prepared comparing actual revenues, expenditures and encumbrances with budgeted amounts.

### **Authorization of Budget Adjustments**

The budget is a dynamic rather than a static revenue and spending plan which requires adjustment from time to time as circumstances change. Approval of the City Council is required for increases in total department or fund budgets, increases or decreases in the personal services budget total of a department or fund, increases in the level of authorized positions, or changes to capital outlay items in amounts greater than \$5,000.00. Approval of the City Administrator is required for changes to capital outlay budgets in amounts less than \$5,000.00. Approval of the City Administrator is required for budget transfers within the department, excluding changes which alter personal services.

### **Budget Amendment Process**

City Council shall authorize new projects by approving a Project Resolution which shall include the estimated cost and funding source. At the end of each fiscal year quarter any necessary budget adjustments, including budgets for any projects authorized during the quarter, shall be enacted through a budget resolution. These supplemental budget resolutions shall be balanced for each and every fund.

### **Budget Lapses at Year End**

All operating budget appropriations, except for Capital Project Funds, shall expire at the end of a fiscal year. In accordance with generally accepted accounting principles, purchases encumbered in the current year but not received until the following year are paid from the budget of the following year. However, when necessary, City Council may make a re-appropriation to resolve unusual situations or hardships caused by this policy.

### **Unreserved Fund Balance**

The City shall attempt to establish an unreserved fund balance in the General Fund. The purpose is to pay expenditures caused by unforeseen emergencies, handle shortfalls caused by revenue declines, and to eliminate any short-term borrowing for cash flow purposes. This reserve shall accumulate and attempt to be retained at an amount which represents 3 month or .25 of operating expenditures.

### **Utilization of Prior Year's Fund Balance in Budget**

Unreserved fund balance may be used as a funding (revenue) source for that fund's budget. The amount of unreserved fund balance shall be estimated very conservatively.

### **Contingency Budget**

The City shall include a contingency amount in the General Fund budget for emergency type expenditures which cannot be foreseen when the budget is adopted. The goal of the contingency shall be 2% of the total General Fund budget, and this shall be subject to annual appropriation.

### **Maintenance and Replacement of Capital Equipment**

Priority shall be given in budget preparation and enactment for adequate maintenance of capital equipment and facilities, and for their orderly replacement.

### **Federal and State Grants**

City Council shall approve all grants and grant applications through project resolutions. All Federal and State grants shall be subject to the City's accounting and budgetary policies. All key financial provisions, including required local match, shall be included in the project resolutions. Accounting and budgeting information shall be inclusive of the Federal /State participation as well as local participation. Provisions shall be made in the City's annual budget for anticipated grants.

### **Contributions**

Unless authorized by City Administrator, contributions to programs operated by City departments shall be subject to the City's accounting and budgetary policies. The City welcomes both unrestricted contributions, as well as restricted contributions compatible with the City's programs and objectives. Any material contributions shall be appropriated by City Council prior to expenditure.

### **Administrative Service Fee**

Direct cost will be charged to all funds were practical. When impractical, an administrative service fee or an allocation shall be assessed to the Public Utilities Enterprise Fund by the General Fund. This assessment will be used to reimburse the General Fund for the administrative and support services provided to the Public Utilities Enterprise Fund. With this system, the transfer to the General Fund will increase as the total revenues increase.

### **Net Budget**

A net budget total shall be calculated as well as a gross budget total in order to prevent the "double counting" of revenues and expenditures. The net budget total is calculated by subtracting inter-fund transfer amounts from the gross budget total.

## **II. FINANCIAL POLICIES DEBT**

### **Purpose of Debt Issuance**

The City of Auburn will utilize long-term debt only for capital improvement projects that are too extensive to be financed from current revenue sources. Long-term debt will not be used to finance current or on-going operations of the City.

### **Legal Debt Limitations**

City of Auburn will remain cognizant of the millage assessed for repayment of general government debt and will strive to maintain a stable millage in the debt service area for the benefit of its taxpayers. When it is feasible, special assessment, revenue and other self-supporting bonds will be utilized instead of general obligation bonds.

### **Types of Debt**

The City of Auburn is permitted to issue any form of debt that does not contradict the existing Constitution and laws of the State of Georgia. These include, but are not limited to:

- General Obligation Bonds
- Revenue Bonds
- Intergovernmental Contracts
- Lease Purchases
- Certificates of Participation
- Temporary Loans

Tax anticipation notes or any other revenue anticipation borrowing will be avoided. In the event such borrowing occurs on an emergency basis, the debt will be retired in full by the end of the fiscal year in which it is incurred.

### **Debt Features**

**Maturity of Debt:** When long-term financing is utilized, the City will pay back the debt within a period of time that does not exceed the life of the project financed. The City will avoid the use of balloon principal payments at the end of the term of the borrowing.  
**Redemption Provisions:** Where cost effective, the City will incorporate early call or prepayment features into the structured debt.

### **Inter-fund Loans**

Where cost effective, the City may choose to issue loans between funds. Careful analysis will be performed on the lending fund's working capital to assure adequate cash flows will remain after the money is transferred to the borrowing fund and to ensure that the lending fund will not incur financial hardship or an increase in rate structure as a result of the transaction.

A document outlining the amount, rate, repayment terms, and other such pertinent items will be completed by staff after direction is issued by the City Council to complete the inter-fund loan transaction.

### **Rating Agencies**

The City will strive to maintain sound communications with bond rating agencies regarding the financial conditions of the City. The City is committed to continuous full disclosure and reporting to the rating agencies and the investment community through its Comprehensive Annual Financial Reports. The City is committed to maintaining and enhancing existing underlying credit ratings with the established rating agencies.

### **Review of Policies**

Review of debt policies will occur simultaneously on an annual basis with the

review of the Capital Improvements Plan for the City as a whole.

### **III. INVESTMENTS AND CASH MANAGEMENT**

Investment earnings are an important source of revenue. However, the overriding concern at all times is the safety and preservation of the City's cash and investments. The ability to respond efficiently to cash flow requirements is another important consideration. Therefore, the objective of Investment and Cash Management is to maximize interest earnings, within an environment that strongly emphasizes legal compliance and safety while providing cash flow liquidity to meet the City's financial obligations.

#### **Scope**

This policy applies to all cash and investments which are the responsibility of and under the management of the Financial Services Department. Exclusions to this policy include, but are not necessarily limited to the City's Pension Trust Fund and Deferred Compensation Fund.

#### **Safety**

Investments shall be made with prudence, judgment and care, not for speculation, but for investment considering the primary objective of safety as well as the secondary objective of obtaining competitive market rates of return.

Specifically, the City shall seek to maximize safety through the following strategies:

1. All City investments shall be federally-insured or fully collateralized to protect investment principal and accrued interest. Emphasis shall be given to Category 1 collateralization (collateral securities held by the City or its agent in the City's name), which is preferable, or Category 2 (collateral securities held by the counter party's trust department or agent in the City's name). Category 3 (collateral not in the City's name) shall be avoided due to the higher degree of risk.
2. Market risk shall be avoided by limiting investments to a maximum one year of maturity, except for special circumstances where an interest rate differential and certainty of ability to hold the investment to maturity would justify a longer maturity. The City Administrator shall approve any exceptions to the one-year maturity limit, and such exceptions will be disclosed to City Council.
3. Undue credit risk shall be avoided by monitoring the financial condition of financial institutions participating in the City's investment program. Financial institutions shall provide a consolidated report of condition semi-annually and the City shall review credit-worthiness at least annually.

#### **Legal Investment Instruments**

The City shall invest in only such investment instruments permitted by State of Georgia law for local governments which include certificates of deposit, repurchase agreements, direct and agency obligations of the United States, obligations of the State of Georgia, pooled investment programs of the State of Georgia, and no-load mutual funds of direct
